

# Typical services

Some example services that we can provide are the following:

- [Courses](#): Security6.net has extensive experience with giving courses and make sure that all participants in lectures, courses and workshops benefit and get materials that can be used further on.
- IT Security Policy. We work closely with partners such as [Neupart A/S](#) and are able to provide you with a starting point in security policies in a very efficient and timely manner.
- Security audits: We can go through your existing network with regards to architecture, vulnerabilities and other central areas.
- Security evaluation: We can do an unbiased analysis of security products and solutions which are to be implemented in your company. Finding alternatives and evaluating security aspects with regards to your expected use of the products.

# Prices and conditions

The hourly rate is a standard fee of 1400,- DKK excluding VAT.

Preparation time for courses and seminars are calculated using a factor of 2 to 1 compared to the duration of the course. Courses which allow Security6.net to keep the copyright get a 50% discount on the preparation time. A course held which has a duration of 3 hours would therefore cost 3\*2 hour preparation, with 50% discount and the 3 hour duration, everything included 6 hours.

Courses are always fixed price, the accepted offer. No matter if we use more hours than estimated.

Meetings canceled on the day of the meeting will be charged minimum one hour.

# Copyright

Unless otherwise agreed Security6.net keep the copyright of any material

## Default Publication

produced. The customer receives a free license to reuse, copy internally in the company.

Materials which Security6.net has produced can be given to business partners when necessary - for instance outsourcing partners. These partners may not make further copies of the material, unless previously agreed in writing.

Materials which Security6.net has produced cannot be used commercially, sold, or otherwise be used commercially unless expressly permitted in writing by Security6.net, Henrik Kramshøj

Security6.net reserves the right to republish material for which we have the copyright through other licenses - for example using the [Open Content License \(OPL\)](#).

## Other agreements

If a more permanent agreement including monthly use of hours is entered the conditions can be negotiated individually.

If interested in hearing more about the services then please contact Henrik Lund Kramshøj at the address [hk@security6.net](mailto:hk@security6.net).

Note: to give excellent response on email a rigid email-policy has been defined, it can be read at the address: [http://www.kramse.dk/email\\_en.html](http://www.kramse.dk/email_en.html)
